

I am strongly in favor of a national "do not call" list as well as the strongest possible enforcement for those who violate it, as well as those who violate the current "junk fax" regulations. Charities, non-profits, political campaigns & pollsters should NOT be automatically exempt.

Advertising, marketing, unwanted solicitations are almost every where in our lives, day and night: commercials; web ads; billboards; sponsorships of public arenas & events; and junk mail, to name but a few.

People should be able to create an enforceable zone of privacy within their homes and businesses from a phone call that doesn't announce in advance that it is an uninvited solicitation.

The commission should also make it as easy as possible to signup for a "do not call" list and to report violators, perhaps creating simple web forms for signup and complaints.

Thank you.
